

In the Specification:

Please amend paragraph [0037] to read:

Pl
[0037] The plug part ~~7~~ 17 of the illustrated embodiment has an inside sleeve 22 and a contact carrier 23 which holds the contact elements 5. The inside sleeve 22 which fittingly surrounds the core holding and guiding part 8 when in the contact-making state, has an inside diameter which is at least partially smaller than the outside diameter of the core holding and guiding part 8. The inside contour of the inner sleeve 22 is preferably chosen such that in the installed state of the cable terminal 1, the first section 11 of the core holding and guiding part 8 is pressed together by the inside sleeve 22 so that the cores 4 which have been pushed into the core guidance channels 10 are clamped tight. In the embodiment of the cable terminal 1 shown in Figures 1 and 2, the cable receiver 9 has a clamp cage 24 which acts as strain relief for the inserted cable 3.
